

Green Commitment

amcase **strives to manufacture casework products which are environmentally friendly and superior in construction.**

Products

- * Meet composite Panels Association standard CPA 1-06 EPP defined by Federal Executive order #13101.
- * Casework is also Urea Formaldehyde free, meeting more stringent specifications than ANSI A208.1-199 and ANSI A208.2-2002 standards.
- * Can contribute to LEED points for materials and resources 4.1, 4.2, 5.1, and 5.2 due to our use of 100% recycled wood fiber. We can also contribute to LEED points for materials and resources 7.
- * Materials have a lesser or reduced effect on human health and the environment.
- * Recovered fiber or a combination of both.
- * Casework products are made up of "post consumer" and "post industrial" recycled fiber.
- * Products have a 20 plus year life.
- * Steel to steel fastening system allows for 100% of our casework to have replaceable parts.
- * Products can be refurbished instead of ending up in a landfill.

Manufacturing

- * Currently in process of changing all edge band material to ABS match standard finishes. ABS is known to have no hazardous ingredients or carcinogens.
- * Internal Packaging, external cartons and more than 90% of our casework is recyclable.
- * All manufacturing is done with CNC (computer numeric controlled) machinery with OSHA approved dust collection.
- * Waste materials are captured and used to produce electrical power. Waste scraps are turned over to a waste management company for recycling.
